## 21 Add-On Packs

The full versions, G-Stomper Studio, G-Stomper Producer, G-Stomper Rhythm (free) and G-Stomper VA-Beast Synthesizer (standalone) support the use of additional Content Packs.

An Add-On Pack is an additional App that adds more Sound Sets, Samples, Synthesizer Presets, Patterns, G-Stomper Studio Pattern Sets, or G-Stomper Producer Scenes or Projects to your G-Stomper Setup.

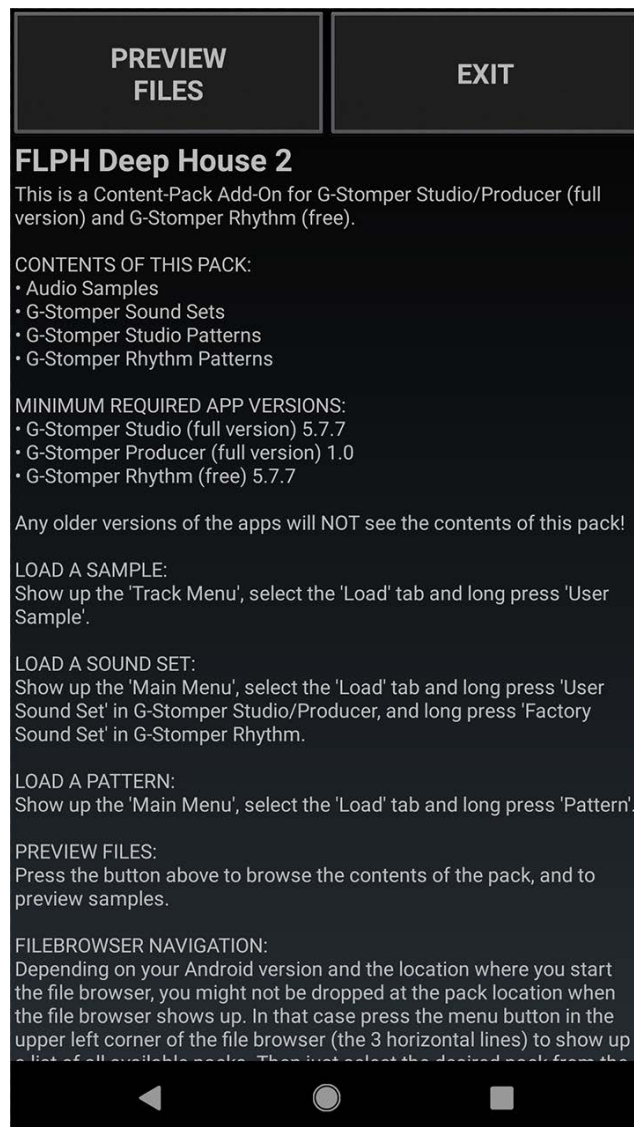

### 21.1 Find Add-On Packs

To find Add-On Packs, simply press the “Get More” button in the Sound Set-, Sample- or VA-Beast Preset- file loading dialog, and you’ll be forwarded to the matching packs in the app store.

## 21.2 Install Add-On Packs

1. Make sure you have the latest G-Stomper Studio (full version), G-Stomper Producer (full version), G-Stomper Rhythm (free) or G-Stomper VA-Beast Synthesizer (full version) installed.
2. Download and install the Add-On Pack from Store like every other App.
3. Optionally, you can start the Add-On Pack App to preview its contents.

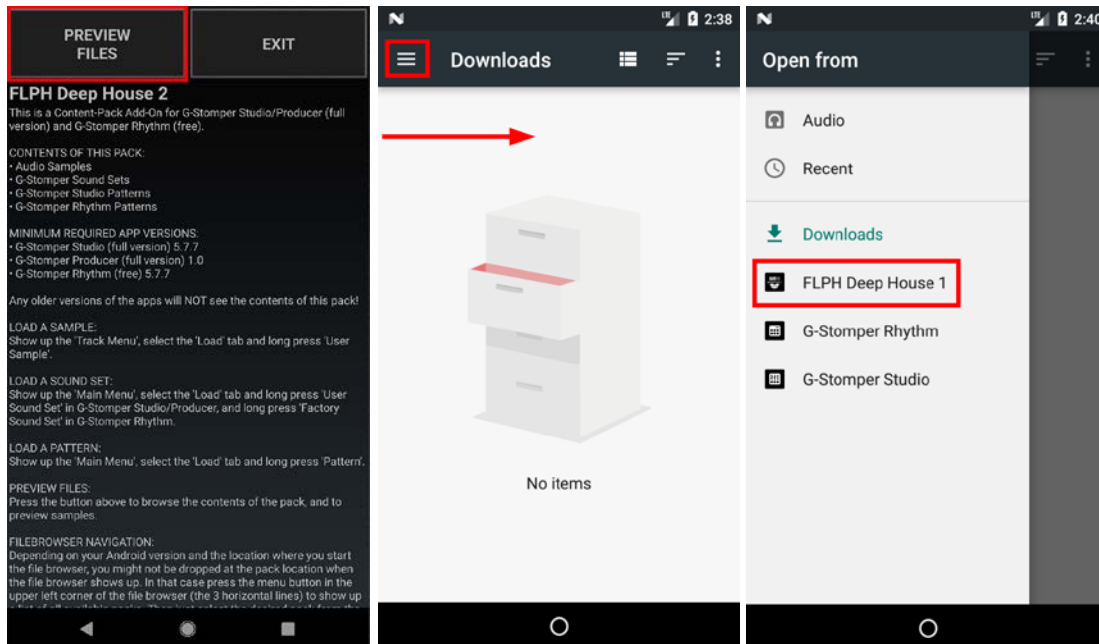

### Note:

Add-On Packs can contain Sound Sets, Samples, Synthesizer Presets, Patterns, G-Stomper Studio Pattern Sets, or G-Stomper Producer Scenes or Projects in any combination. The description, which is provided in the Add-On Pack App, explains how to access and use the Pack Content in the particular G-Stomper apps.

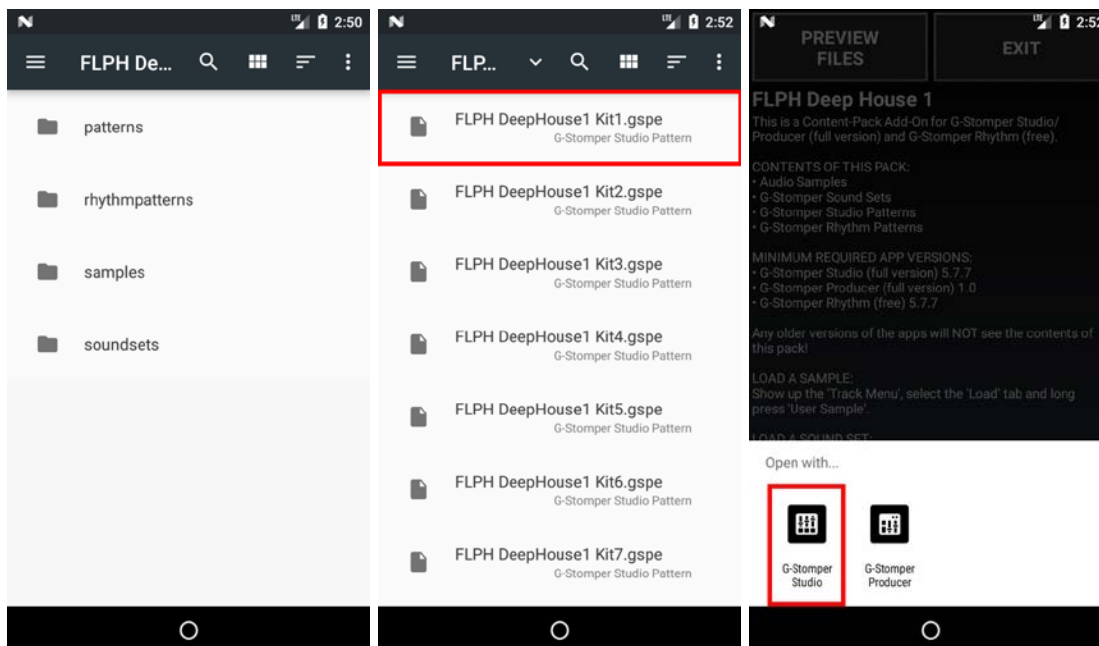

4. Get back to your G-Stomper app and enjoy the new sounds.

## 21.3 Preview the Sounds provided by the Add-On Packs

All contents are provided by the Add-On Packs through the Android “System Files Picker”. The System Files Picker can be shown in various ways, e.g. by pressing the “Preview Files” button in the Add-On Pack app. Once the System Files Picker shows up press the “Menu” button (the three horizontal lines) in the upper left corner (or likewise swipe from left to right), and then select the pack from the menu.

Now you can preview the contents of the pack. Just click the file you want to load/preview, and then select the app in which you want to open the file. If there's only one app available to load the file, then the “Open with...” dialog will be skipped.

**Note:** All files except the samples can be loaded directly via the “Preview Files” function in the Add-On Pack app. Samples can be previewed as well, but you can only load them from inside the particular G-Stomper App, e.g. G-Stomper Studio.

**21.4    How to use the Sounds provided by the Add-On Packs**

**21.4.1    G-Stomper Sound Sets**
