Important Note:
The Programmable Multi-Mute feature is available in G-Stomper Studio, G-Stomper Rhythm, and G-Stomper VA-Beast (standalone). It is <u>not</u> available in G-Stomper Producer.

Contents

12   Programmable Multi-Mute

## 12.1   Configure and use the Multi-Mute (Mixer, FX, Master/SumFX)

The Programmable Multi-Mute feature is dedicated for live usage; it can be used to mute/unmute multiple tracks at once. It can be programmed and used on the Mixer, FX and Master/SumFX screen.

Once programmed, you can also turn it ON/OFF on all screens that provide Track Pads (Main Drum Machine, Sampler Note Grid, Sampler Track Grid and Sampler Drum Pads, VA-Beast Synthesizer, VA-Beast Poly Grid, VA-Beast Keyboard).

Short Click   : Multi-Mute ON/OFF
Long Click   : Multi-Mute Configuration ON/OFF

Multi Mute States:

Multi-Mute OFF
Un-Mutes all configured tracks

Multi-Mute ON
Mutes all configured tracks

Multi-Mute Configuration ON (Multi-Mute OFF)
Select the Tracks (to be affected by the Multi-Mute) by toggling the Tx Buttons ON/OFF.
Since the Multi-Mute is OFF, the configuration does not affect the actual/audible Track Mutes.

Multi-Mute Configuration ON (Multi-Mute ON)
Select the Tracks (to be affected by the Multi-Mute) by toggling the Tx Buttons ON/OFF.
Since the Multi-Mute is ON, the configuration directly affects the actual/audible Track Mutes.

Note: The Multi-Mute Configuration is saved per Pattern, so can have dedicated configurations for each part of your live setup.

12.2   Quick Access the Multi-Mute (various screens)

Once you've programmed the Multi-Mute, you can turn it ON/OFF using the Multi-Mute Buttons on the Mixer, FX and Master/SumFX screens, and also on all screens that provide Track Pads (Main Drum Machine, Sampler Note Grid, Sampler Track Grid and Sampler Drum Pads, VA-Beast Synthesizer, VA-Beast Poly Grid, VA-Beast Keyboard).

1. Make sure the Track Pad Mode is set to one of the following:

   • Play/Menu

   • Sel/Mute

   • Sel/Menu (on VA-Beast related screens)

2. Long click the Mode Button to turn the Multi-Mute ON/OFF.

(see also Chapters: Sampler > Sampler Track Pad Mode, VA-Beast Synthesizer > VA-Beast Track Pad Mode)
